1. Industrial Preparatory Schools (IPP) were established to afford free education to peasant youths in the 15-19 year age group. Parents or guardians wishing to enroll their children in IPP must promise that the children will serve in a designated position for at least two years following completion of their training.
2. Students at the IPP work two days per week in a factory which is usually adjacent to the school. The academic portion of their course consists of 26 hours of lectures per week: 17 hours on general subjects, and nine hours on technical matters. They must also attend a club at least three times per week to hear political lectures. They receive some preliminary military training and are encouraged to participate in sports. Each student is given a navy-blue dress suit and a work outfit which includes dark blue overalls, a cap, and a pair of shoes.
3. During 1947, 380 million zlotys were expended on IPP. The estimated cost of IPP training in 1948 is 40 thousand zlotys per student.
4. Special instructor courses of six weeks' duration are also offered in conjunction with the IPP. Following is a preliminary budget for the operation of two such instructor courses:
